

## CASE STUDY

# How Coherent Solutions upskilled their Developers and QA Engineers on TryHackMe

*20 developers and QA Engineers use TryHackMe to build a secure company culture and upskill qualified specialists with ongoing training*

### Desired Outcome

- Engaging, broad & up-to-date curriculums
- Hands-on experience in offensive/defensive security
- All-in-one platform
- Ability to freely reassign licenses once people complete the required curriculum

### Results

- ✓ TryHackMe helped to break the dangerous mindset that software is 'secure by default'
- ✓ Helped build a secure company culture
- ✓ Successful upskilling for qualified specialists

### ORGANISATION BACKGROUND

Coherent Solutions is a digital product engineering company focused on empowering business success. Their global team delivers innovative solutions that drive measurable business impact.

Coherent Solutions has been at the forefront of digital product engineering, pioneering innovation and driving success for businesses worldwide.

### CHALLENGE

Their biggest challenge was that the workforce incorrectly understood that software is secure by default.

Coherent Solutions wanted to have an engaging, broad, and up-to-date curriculum to upskill their development and quality teams.

In the past, they have experienced that many vendors provide theoretical courses without hands-on experience in offensive / defensive security. Additionally, alternative training content offers limited scope and is not frequently updated.

## OUR PARTNERSHIP

Following initial successes using TryHackMe, Coherent Solutions has recently expanded its subscriptions from 5 to 20 users. They plan to introduce a training group that will leverage the platform over the coming year.

In recent weeks, the 15 new users have completed the Web Fundamentals learning path and saw great uptake. In the last quarter alone, the Coherent Solutions team saw a combined 234 hours of active learning, 214 rooms completed, and 4,766 questions answered.

In the future, Coherent Solutions plan to customise modules to make the training more applicable to the teams.

## PARTNERSHIP BENEFITS

So far, users have really been enjoying the TryHackMe platform and the hands-on learning it provides.

Coherent Solutions has made fantastic use of TryHackMe's comprehensive hands-on training, learning paths, beginner-friendly tasks, and advanced training content, with training catered to all skill levels. Another benefit is the ability to learn, without the use of their own infrastructure.

*“TryHackMe has helped us build a secure company culture and upskill even the advanced, qualified specialists. With comprehensive hands-on-training and understandable learning paths, the platform has helped to break the dangerous mindset that software is secure by default.”*

**Create branded learning paths that align with skill requirements, and give your team personalised training that transfers to their roles and responsibilities.**

**Continuously develop and empower your team with immersive training for all experience levels, with *hands-on quality training, content variety, and engaging, gamified labs.***

Our team of experts deliver reactive, engaging content that upskills employees from complete beginner levels through to seasoned hackers - equipping employees to tackle industry evolutions. Our flexible approach enables businesses to transfer licenses, customise learning paths to align with team goals, and revolutionise training remotely, safely, and with brilliant results.
